OVERVIEW Scientist with over twenty years experience in toxicology, risk assessment, mathematical modeling, statistics, neuroscience, and environmental/ecological health issues

EDUCATION

1989 Ph.D. Neurobiology & Behavior, Georgia State University, Atlanta, GA

1971 B.A. Biology, Middlebury College, Middlebury, VT

PROFESSIONAL CERTIFICATIONS

1994 - Diplomate of the American Board of Toxicology

EMPLOYMENT HISTORY

2004 - present Principal, Ted Simon, LLC, Winston, GA

2006 – present Adjunct Professor, Environmental Health Science, College of Public Health, University of Georgia, Athens, GA

1996 - 2006 Toxicologist, US Environmental Protection Agency, Region 4, Atlanta, GA

2003 Instructor, Department of Biology, Georgia State University, Atlanta, GA

2001 - present Instructor, Department of Environmental Health Science, University of Georgia, Athens, GA

1996 Environmental Health Scientist, Agency for Toxic Substances and Disease Registry/Centers for Disease Control, Atlanta, GA

1994 - 1996 Toxicologist, US Environmental Protection Agency, Region 4, Atlanta, GA

1993 - 1994 Project Scientist, ManTech Environmental Inc., USEPA Region 4, Atlanta, GA

1993 Assistant Professor of Biology, Life College, Marietta, GA

1991 - 1993 Georgia State University, Postdoctoral Research Associate, Atlanta, GA

1989 - 1991 Emory University, Postdoctoral Research Fellow, Atlanta, GA

1982 - 1988 Georgia State University, Research/Teaching Assistant, Atlanta, GA

BIO SKETCH

Dr. Simon is the principal and owner of Ted Simon, LLC, providing scientific support to a select group of clients. Dr. Simon has provided consulting services to clients that include large and small private sector companies, attorneys, industry trade groups, environmental assessment and remediation firms, state, federal and international regulatory agencies, university faculty and others. He provides scientific support in the areas of toxicology, environmental risk assessment, product liability, statistics, drug and alcohol abuse, risk communication and other issues. He has taught graduate level university courses and private/public sector short courses in risk assessment, statistics and simulation modeling. He maintains scientific interests in the toxicology of dioxin, polychlorinated biphenyls (PCBs), mercury, arsenic, chromium and polycyclic aromatic hydrocarbons (PAHs), statistical and probabilistic methods in exposure and toxicity assessment, physiologically-based pharmacokinetic (PBPK) modeling and ecological risk assessment. He has provided litigation support as expert testimony and consultation for both private sector clients and EPA.

As a consulting scientist, Dr. Simon has worked on environmental and toxicological issues related to dioxin, PAHs, PCBs, arsenic, chromium, mercury, and other chemicals. He has provided advice to attorneys regarding environmental risk, accidental poisoning, intellectual property issues related to chemical products, health effects of indoor mold exposure, and alcohol and substance abuse issues. He has performed pro bono work for the Georgia Department of Natural Resources and the International Life Sciences Institute and others.

Previously, Dr. Simon was employed for twelve years by the Environmental Protection Agency, Region 4, in Atlanta. While at EPA, Dr. Simon served as the senior toxicologist in the Waste Management Division. In this role, he provided scientific support and assistance with public dialogue and communication at many public and private sector hazardous waste sites in Region 4. On a national level, he served as a resource for toxicological, chemical, health and ecological data regarding exposure to hazardous substances. He provided guidance to EPA, DOD state and private sector managers and personnel about risk communication. He developed national and regional guidance in the areas of probabilistic risk assessment, soil cleanup, statistics and toxicology.

CONTINUING EDUCATION

- 2012 The Use of Physiologically-Based Pharmacokinetic Modeling to Inform Early Life Sensitivity to Chemical Toxicity. Taught by Drs. Harvey Clewell, Rebecca Clewell, Miyoung Yoon, Rogelio Tornero-Velez and Matthew P. Longnecker
- 2010 Nuclear Receptors: Role in Chemical Mode of Action and Targets for Toxicity Testing. Society of Toxicology Annual Meeting. Taught by Dr. Chris Corton and Dr. Jack Vanden Heuvel
- 2010 Technologies and Tools for Toxicity Testing in the 21st Century. Society of Toxicology Annual Meeting. Chaired by Dr. Robert Kavlock and Dr. Don Wilson.
- 2009 Visual Presentation of Quantitative Information, Dr. Edward R. Tufte, Atlanta, GA
- 2007 Toxicology and Molecular Biology of Tissue Repair, Short Course, Society of Toxicology Annual Meeting, taught by Dr. Harihara Mehendale and Dr. Chris Corton
- 2000 Environmental Statistics, Region 4 EPA, taught by Dr. Richard O. Gilbert

- 1996 Physiologically Based Pharmacokinetic Modeling, NIEHS, Research Triangle Park, NC, taught by Dr. Chris Portier and Dr. Michael Kohn
- 1995 Risk Communication and Public Dialogue Workshop, Brooks AFB, San Antonio, TX, taught by Dr. Vincent T. Covello
- 1994 Risk Communication Workshop, EPA Region 4, Atlanta, GA, taught by Mr. Andrew Swarcz
- 1994 Mid-America Toxicology Course, Kansas City, MO, taught by Dr. Curtis Klaassen

PROFESSIONAL AFFILIATIONS

- 1995 - Society of Toxicology
- 1997 - 2000 Society for Risk Analysis
- 1984 – 1993 Society for Neuroscience

SIGNIFICANT ACTIVITIES

- 2013 *Presentation to a French Government Agency on Product Safety***
Estimates of both toxicity and exposure to workers using a synthetic dielectric compound manufactured by a company in the UK were developed and presented to a French Government agency in support of continued use of the product.
- 2013 *Ongoing Consultation to a Water Utility Regarding the Quality of Water Provided to a Community***
Provided initial consultation and coordinated a peer review of a risk assessment of a pesticide occurring in trace amounts in the water. The risk assessment was conducted by a state toxicologist, and the peer review involved two other scientists.
- 2013 *Preparation of a Report Providing Derived LD50 Values for Metals in Fly Ash***
Doses of fly ash representing the LD50 for metals were developed for fly ash produced by an incinerator operated by a large county government in the Western US. These values were needed for compliance with state regulations.
- 2013 *Development of Tables for EPA's IRIS Assessments***
Developed tabular format for presenting mode of action and toxicity information consistent with the National Academy of Sciences' *Review of the Environmental Protection Agency's Draft IRIS Assessment of Formaldehyde*. Presented the tables and accompanying rationale to EPA IRIS staff using hexavalent chromium as an example.
- 2013 *Preparation of an OECD Report on the Aryl Hydrocarbon Receptor Adverse Outcome Pathway***
Wrote draft for eventual submission to OECD; responded to comments from industry stakeholders; prepared final OECD submission.
- 2012-13 *Pro-bono Development of a Manuscript on the Quantitative Dose Response / Human Relevance Framework***
Working with the International Life Sciences Institute / Human and Environmental Sciences Institute (ILSI/HESI), helped author a manuscript for publication on application of mode of action in risk assessment.

- 2013 *Development and Presentation of Responses to Charge Questions for EPA's FIFRA Scientific Advisory Panel***
Wrote responses on physico-chemical screening and the rainbow trout Expert System for estrogenic effects; presented the responses at the FIFRA/SAP meeting at EPA Headquarters.
- 2012-13 *Participation on a Risk Assessment Team developing methodology to assess a large area floodplain***
With four other experienced risk assessors, participated in both discussions and independent evaluations for eventual use to support cleanup decisions at an impacted area comprising several square miles and many river miles.
- 2012 *Participation in a Weight-of-Evidence Workshop sponsored by the American Chemistry Council***
Presented tables needed to organize EPA risk assessment to a diverse group from industry, government and academia.
- 2012-13 *Modeling of Dioxin-induced Gene Expression in Breast Cancer Cells***
Working with Dr. Jason Matthews of the University of Toronto to develop a model of transcription and gene expression. This model uses both traditional and stochastic methods to determine probabilities of thresholds.
- 2012 *Use and Validation of HT/HC Assays to Support 21st Century Toxicity Evaluations***
As part of EPA's Computational Toxicology Program, high throughput in vitro assays used in the pharmaceutical industry were adapted to predict potential adverse effects of environmental chemicals. This white paper and manuscript highlights the need for additional validation methods for this high throughput methodology.
- 2012 *Review of EPA's Toxicological Review of Ammonia***
As part of the IRIS program, EPA prepares Toxicological Review documents for chemicals. Presented results at EPA's IRIS listening session on Ammonia. The recent EPA risk assessment for formaldehyde was submitted for review to the National Academy of Sciences (NAS). In their review, the NAS made a number of recommendations for improving the IRIS process. Ammonia is the first chemical for which the NAS recommendations were implemented. Reviewed the EPA document for ammonia to determine consistency with the NAS recommendations.
- 2012 *Review of 2012 Texas Commission on Environmental Quality (TCEQ) "Guidelines to Develop Toxicity Factors"***
TCEQ develops its own toxicity criteria and does not depend on EPA's IRIS database. This guidance has been in development for two years. Prepared comments on the guidance for a chemical industry trade organization for submission to TCEQ.
- 2012 *Development of a Margin of Exposure for Enzyme Induction from Dioxin Exposure for Comparison with Recent EPA Toxicity Factors for a Weight-of-Analysis***
Dioxin-like chemicals act by inducing changes in gene expression. One of the enzymes induced by dioxin metabolizes thyroid hormone. Using data from both humans and laboratory test species, determined the dose at which an increase in thyroid hormone metabolism could be expected and compared this dose with the current EPA reference dose based on thyroid effects in newborns.
- 2012 *Assessment of Risk from Metal Plating Flaking from an Auxiliary Faucet used with a Water Filter***
Developed risk estimates for water consumers from dissolved metals and metal flakes from the faucet. This assessment was used internationally and therefore incorporated World Health Organization methodology.

- 2012** ***Preparation of a White Paper and manuscript for publication on Validation of EPA's ToxCast™ Suite of High Throughput In Vitro Assays***
Wrote narrative paper and manuscript for a chemical industry trade group on issues with validation of these assays for chemical screening and prioritization and ultimately hazard prediction.
- 2011** ***Development of Physiologically-based Pharmacokinetic Models for Dioxin, PCBs, DDT, Hexachlorobenzene and Organophosphate Pesticides for use as teaching tools at the Agency for Toxic Substances and Disease Registry (ATSDR)***
Working as an ATSDR contractor, developed PBPK models in Berkeley Madonna software for use as teaching aids for personnel at ATSDR.
- 2011** ***Review of EPA's Physiologically Based Pharmacokinetic Model for Acrylonitrile Used in the IRIS Risk Assessment***
Reviewed the MATLAB computer code and output for optimization of parameters used in this model.
- 2011** ***Presentation of Revised Toxic Equivalence Factor for 2,3,7,8-Tetrachlorodibenzofuran (TCDF)***
TCDF is a dioxin-like chemical that is metabolized and eliminated within hours in contrast to other dioxin-like chemicals that persist in the body for years. Developed an estimate of the TCDF TEF that incorporates this rapid metabolism and presented this work at Dioxin 2011, an international conference on halogenated chemicals, held in Brussels, Belgium.
- 2011** ***Successful Peer Review of 2009 RfD for 2,3,7,8-Tetrachlorodibenzodioxin (TCDD) for inclusion in the ITER and TOXNET databases***
Presented conclusions from a 2009 publication to a peer review panel convened by Toxicology Excellence in Risk Assessment (TERA); after successful peer review, the RfD has been placed on the International Toxicity Estimates for Risk Assessment (ITER) and linked to the National Library of Medicine's TOXNET databases at http://iter.ctcnet.net/publicurl/pub_view_12_canc.cfm?crn=1746-01-6&type=CO
- 2011** ***Dose-Response Modeling of Caprolactam Effects in Humans***
Conducted dose-response modeling of nasal and ocular effects in support of comments on a regulatory toxicity assessment of caprolactam, a substance used in the manufacture of nylon.
- 2009-12** ***Ongoing support and Scientific Consultation about an ongoing Mode of Action study for Hexavalent Chromium carcinogenicity***
Provides ongoing review and comment of scientific data generated from a study of the MOA of hexavalent chromium designed to complement the National Toxicology Program's two-year rodent bioassay. Provides advice and strategy for communicating and presenting this information to regulatory agencies. Provides ongoing support by serving as a resource for toxicological and risk assessment information for toxicological issues related to hexavalent chromium; helps design and choose vendors for a study of the effects of hexavalent chromium that included genomic, biochemical and pharmacokinetic analysis; met with government personnel in several states for discussions on appropriate environmental standards for chromium; helped develop comments on EPA's IRIS assessment and California's Public Health Goal for hexavalent chromium for submission to EPA.
- 2011** ***Review Article of Aryl Hydrocarbon Receptor Biology and Dioxin Toxicity***
As rapporteur of the AHR expert panel at the Nuclear Receptor workshop (see below), developed narrative for the review paper resulting from this workshop.
- 2010-11** ***Alliance for Risk Assessment Presentation on Dioxin using Science and Decisions Conceptual Models***
Presented results from the application of dose response methods described National Research Council's 2009 Report "Science and Decisions: Advancing Risk Assessment" to dioxin. The audience was an expert panel that included several of the authors of the NRC report.

- 2010** ***Comments on Biota-Sediment Accumulation Factor (BSAF) for Aroclor 1260***
Provided a review and commentary on the development of a BSAF for Aroclor 1260 (PCB mixture) and its general applicability to PCB contaminated sites.
- 2010** ***Rapporteur at a Workshop on Dose-Response Approaches for Nuclear Receptor-Mediated Modes of Action***
Led panel discussion and provided the presentation of the report for the panel examining the mode of action of the aryl hydrocarbon receptor that mediates gene expression from dioxin-like chemicals.
- 2010** ***Risk Assessment for Dioxin based on the Occurrence of Chloracne in Humans***
Developed a risk assessment for 2,3,7,8-tetrachlorodibenzo-p-dioxin based on data from humans only and presented the work at the Dioxin 2010 meeting in San Antonio, TX.
- 2010** ***Statistical Analysis of Reproductive Endpoints in Rats Exposed to Flame Retardant Chemical***
Performed statistical analysis of dichotomous data for reproductive endpoints to inform a European consortium about the most appropriate methods for data analysis.
- 2010** ***Development of a Publication on Responses of Human and Rodent Liver Cells to Dioxin-Like Chemicals***
Conducted statistical analysis of genomic and proteomic data from human and rodent tissues in vitro and developed a draft of a manuscript titled "Human and Rat Primary Hepatocyte CYP1A1 and 1A2 Induction with 2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD), 2,3,7,8-Tetrachlorodibenzofuran (TCDF) and 2,3,4,7,8-Pentachlorodibenzofuran (4-PeCDF)." The manuscript has been published in *Toxicological Sciences*.
- 2010** ***Member of NIEHS Study Section on Risk Assessment of Engineered Nanomaterials***
Conducted primary grant review and led discussion for four grants.
- 2010** ***Publication on the Ethics of Environmental Regulation***
"Just Who is at Risk? The Ethics of Environmental Regulation" has been published in *Human and Experimental Toxicology*.
- 2010-13** ***ILSI-RF Working Group on Framework for Mode of Action***
Participant on the Dose Response Subteam of the Risk Assessment in the 21st Century Project of the International Life Sciences Institute Research Foundation.
- 2010** ***Expert Testimony regarding the Effects of Inorganic Mercury***
Provided an expert opinion in Fulton County Court in Atlanta, GA regarding the neurological, gastrointestinal and renal effects of inorganic mercury.
- 2010** ***Development of Cancer Slope Factors and Toxicity Equivalence Factors for Dioxin-Like Chemicals based on Internal Doses***
Developed a comparison of the toxicity of four dioxin-like chemicals based on tissue concentrations from National Toxicology Program bioassays. The work involved both physiologically-based pharmacokinetic modeling and dose response modeling.
- 2010** ***Screening Level Ecological Risk Assessment for a site in Flowery Branch in Hall County, Georgia***
The site is in an industrial park near an interstate highway. The area of potential ecological concern consists of a storm-water retention pond and a stream. The chemicals of potential concern were volatile organic chemicals discharging from groundwater to surface water.

- 2009** ***Evaluation of Toxicity Equivalence Factors for Dioxin-like Chemicals based on external doses***
Developed a comparison of methods used to develop values for TEFs used in risk assessments of dioxin-like chemicals.
- 2009** ***Streamlined Human Health and Ecological Risk Assessments to support Removal Action at the Nabesna Mine Site in Nabesna, Alaska***
This site is located in the Wrangell-St. Elias National Park and was a functioning gold mine in the early 20th century. The chemicals of potential concern were metals associated with mine tailings and acid mine drainage.
- 2009** ***Responses to EPA Charge Questions for Review of the 2009 Toxicological Review of 1,4-Dioxane***
Working as a sub-contractor, developed responses to EPA's "Charge to External Reviewers for the Toxicological Review of 1,4-Dioxane." The responses were for questions relating to uncertainty analysis, physiologically-based pharmacokinetic (PBPK) modeling and Benchmark Dose modeling.
- 2009** ***Development of Physiologically-based Pharmacokinetic Models for Methylmercury, Arsenic and Cadmium and Bisphenol-A for use as teaching tools at the Agency for Toxic Substances and Disease Registry (ATSDR)***
Working as a sub-contractor, developed PBPK models in Berkeley Madonna software for use as teaching aids for personnel at ATSDR.
- 2009** ***Development of Georgia Risk Reduction Standards (RRS) for Drexel Chemical Company in Cordele, GA***
Calculated Georgia RRS values for this site. Negotiated in person and by teleconference with Georgia Environmental Protection Division personnel regarding the appropriate use of toxicity criteria.
- 2009** ***Consultation and Statistical Modeling regarding Dose Response of Perfluorooctanoic Acid (PFOA)***
PFOA is a chemical used in the production of Teflon. Provided consultation regarding dose response modeling for PFOA as a sub-contractor to a consulting firm in Tallahassee, FL.
- 2009** ***Consultation regarding USEPA's new Arsenic Cancer Slope Factor***
Briefed attorneys and personnel from electric power providers on the ramifications of EPA's proposed change in the oral cancer slope factor for Arsenic.
- 2009** ***Development of a Scientific Publication presenting Cancer Toxicity Criteria for 2,3,7,8-tetrachlorodibenzodioxin (Dioxin)***
Following up work presented at EPA's Dioxin Workshop in February and based on comments received on presentation at the 2009 Society of Toxicology meeting, the work has been accepted for publication in *Toxicological Sciences*. In 2010, this paper won honorable mention as the best paper of the year from the Risk Assessment Specialty Section of the Society of Toxicology.
- 2009** ***Assessment of the Relative Susceptibility of Monkeys and Humans to PCBs***
Estimated the relative susceptibility of monkeys and humans to the dioxin-like effects of PCBs and presented this work in a poster at the 2009 Society of Toxicology meeting.
- 2009** ***Development of Georgia Risk Reduction Standards for Chemicals in Soil and Groundwater***
As a sub-contractor, developed media standards for chemicals in soil and groundwater related to a hazardous waste site in north Georgia.

- 2009** ***EPA Dioxin Workshop***
Attended EPA's Federal Advisory Commission Act (FACA) Workshop on the risk assessment of 2,3,7,8-tetrachlorodibenzodioxin (TCDD); provided public commentary on EPA's proposed methods for revising the 2003 dioxin reassessment; presented a poster at the workshop and at the 2009 Society of Toxicology meeting showing cancer risk estimates based on the recent National Toxicology Program's cancer bioassay for TCDD.
- 2009** ***Risk Communication and Regulatory Review related to the TVA Coal Ash Spill in Kingston, TN***
Provided risk communication at public availability session for both the American Coal Ash Association and TVA; reviewed submissions to EPA developed by TVA.
- 2008** ***Development of an Issue Paper on the Ethics of Environmental Regulation and Compounding Conservatism in Risk Assessment for the Ontario Ministry of the Environment***
Discussed both historical philosophical literature and modern scientific publications to provide an understanding of the ethics of environmental regulation and the extent to which environmental regulations and standards are based on the precautionary principle. Provided a recommendation of a proportion of a target population to include in an environmental standard based on this ethical discussion.
- 2008** ***Assessment of Conservatism of Soil and Groundwater Standards for the Ontario Ministry of the Environment***
Used statistical methods and Monte Carlo simulation to develop an assessment of the level of conservatism of proposed environmental media standards. This assessment included consideration of exposure, fate and transport and toxicity. The specific chemicals considered included arsenic, chromium, benzo(a)pyrene, benzene, trichloroethylene, vinyl chloride and polychlorinated biphenyls.
- 2008** ***Evaluation of Soil Concentrations of Arsenic with an Emphasis on Local Background***
Developed a report for submission to the Georgia Environmental Protection Division regarding a release of waste material containing arsenic that occurred by stormwater runoff. The report considered the geology and local background concentration and included a statistical analysis showing that arsenic concentrations remaining after cleanup of the waste material did not exceed the Georgia residential risk reduction standards under Georgia HSRA Rule §391-3-19-.07(4)(e).
- 2008** ***Consultation on the pesticide Toxaphene for the US House of Representatives Committee on Energy and Commerce***
Provided scientific background information on the pesticide toxaphene via conference call to Mr. John G. Arlington, senior counsel for Oversight and Investigations.
- 2008** ***Peer Review of Technical Profiles for Cyclohexane, Ethylene and Propylene for the US Environmental Protection Agency***
Provided peer review comments on Technical Review documents on cyclohexane, ethylene and propylene for Eastern Research Group for EPA's Office of Environmental Information. These documents are part of the hazard assessment for section 313 of the Emergency Planning and Community Right-to-Know (EPCRA) Act of 1986.
- 2008** ***Statistical Evaluation of Solvent Data in Groundwater and Critique of ATSDR Health Assessment of a Superfund Site***
Developed a report that included suggestions and comments on the ATSDR Report. Performed a statistical analysis to refine the conclusions reached and critiqued the methodology for the Health Assessment.
- 2008** ***Lecture on the Toxicology of PCBs***
Developed and presented a training segment as part of the Toxic Substance Control Act (TSCA) training for electric power company personnel.
- 2008** ***Quality Assurance for Fish Consumption Risk Assessment on the Passaic River***
Reviewed and provided comments on both the accuracy and conceptualization of the risk assessment.

- 2008** ***Risk Communication and Expert Consultation regarding Aerosol Emissions***
Retained as an expert in toxicology to provide scientific consultation and risk communication regarding emissions of several inorganic chemicals from power plants.
- 2008** ***Expert Consultation regarding Possible Mercury Exposure***
Provided expert consultation and an expert report to attorneys interested in the neurological and psychological effects of inorganic mercury.
- 2008** ***Development of Georgia Risk Reduction Standards for Trivalent and Hexavalent Chromium and several Volatile Organic Chemicals***
Developed numerical standards under Georgia's Hazardous Site Response Rule 391-3-19 as a subcontractor in support of a property sale and transfer
- 2008** ***Consultation regarding the role of Dioxin and PCBs in the Hazard Ranking Score and Risk Assessment at a Superfund Site***
Provided expert consultation to attorneys interested in knowing how the presence of dioxin-like chemicals and PCBs affected the regulatory history of a Superfund site in New England and may provide a deposition later this year.
- 2008** ***Development of an Abstract on Dioxin Cleanup Levels for Submission to Dioxin 2008.***
Each year, an international meeting on the toxicology of dioxin and other chlorinated chemicals is held in a different location. Developed a 4 page abstract condensed from a 120 page report.
- 2008** ***Investigation of the Diagnostic Procedures of the Intoxilyzer 5000***
Examined the scientific literature regarding the temperature dependence of alcohol vapor and the how this dependence would affect the temperature check and diagnostic routines of the Intoxilyzer 5000 used to measure breath alcohol in Georgia for use by attorneys.
- 2008** ***Introduction to Risk Assessment, a two day class for the Ontario Ministry of Environment***
With Dr. Richard Hertzberg, developed and taught a class on Introduction to Risk Assessment for newly hired personnel at the Ministry
- 2008** ***Investigation into the Scientific Basis of Land Disposal Limit of 50 parts per million for PCBs***
Under the 1979 Toxic Substances and Control Act (TSCA), EPA has placed an upper limit of 50 ppm for land disposal of PCBs. Investigated the scientific basis of this value for application at the ACME Holtrachem former chlor-alkali plant site in North Carolina.
- 2008** ***Review of Cleanup Target Levels of Florida Department of Environmental Protection***
As part of the involvement with the Kabot-Coppers site, provided a review of the Cleanup Target Levels developed by the Center for Environmental and Human Toxicology of the University of Florida and used for regulation by Florida Department of Environmental Protection.
- 2008** ***Consultation on Georgia Risk Reduction Standards***
Provided consultation regarding toxicology of chlorinated solvents and metals for development of standards for a facility in north Georgia.
- 2008** ***Review of PCB Ecotoxicology Information in the Baseline Ecological Risk Assessment for the LCP Chemical Site, Brunswick, GA***
Reviewed the toxicity assessment for PCBs for the ecological risk assessment for this site to ensure consistency with the values and approach used in the human health risk assessment.

- 2007-8 Consulting Expert in a Toxic Tort Case regarding Indoor Dampness and Mold**
Served as a consulting expert regarding adverse effects of exposure to indoor dampness, associated mold and bacteria and the disinfectant chemicals used in the cleanup.
- 2007 Evaluation of Calculation Methods for the Georgia Risk Reduction Standards of the Georgia HSRA Program**
As a sub-contractor, examined RRS values for soil and groundwater developed for a site in north Georgia and provided an explanation of the rationale underlying discrepancies in the values.
- 2007 Toxicity Criteria for 2,3,4,7,8-Pentachlorodibenzofuran based on Internal Tissue Concentrations in Rats**
Developed both cancer potency estimates and noncancer reference dose estimates for 2,3,7,8-TCDD and 2,3,4,7,8-PeCDF using data from bioassays published by the National Toxicology Program in 2006.
- 2007 Comparison between Blood Levels of Dioxin in residents of Midland, MI and those in rats associated with Adverse Effects**
Conducted a comparison between human blood levels of 2,3,7,8-TCDD and 2,3,4,7,8-PeCDF measured in humans in the University of Michigan Dioxin Exposure Study and estimated blood levels in rats from bioassays published by the National Toxicology Program in 2006.
- 2007 Pro Bono Evaluation of Exposure to para-dichlorobenzene (PDB)**
Developed a report on exposure and potential liver damage in an individual working in a botany laboratory in which PDB was used as an insect fumigant for plant specimens. The report was used to obtain benefits under Workman's Compensation.
- 2007-9 Risk Assessment for the Exposure to Mercury and PCBs from contact with Marsh Sediment and Consumption of Fish and Game Birds at the LCP Chemical Site, Brunswick, GA.**
As a sub-contractor, conducted a risk evaluation for sediment exposure and, fish consumption with development of site-specific fish consumption estimates and a site-specific sediment exposure estimate for an updated Remedial Investigation Report for submission to the US Environmental Protection Agency.
- 2007 Development of a Risk Assessment Methodology Based on Changes in Gene Expression**
With very recent information on dioxin-related gene expression changes in the liver, developed a method for using these changes as a biomarker for the progression to type 2 diabetes.
- 2007 Pro Bono Evaluation of Georgia DNR Fish Advisories for PCBs and Mercury**
Using the toxicity criterion for the PCB mixture Aroclor 1268 recently published (see below) and EPA information about mercury, re-evaluated current fish advisories near Brunswick, GA. This work was done for Dr. Randy Manning, the Georgia state toxicologist.
- 2007 Member of an Expert Panel Developing a Protocol for Toxicity Testing of Weathered Toxaphene**
Served on an expert panel to refine a protocol for toxicity testing of weathered toxaphene mixtures and individual toxaphene congeners.
- 2007 Soil Cleanup Standards for Dioxin related to the Georgia Hazardous Substances Response Act for a secondary copper smelter**
Consulted with smelter personnel and another contractor to develop a dioxin cleanup level in soil for consideration by the Georgia EPD including consideration of a recent epidemiological study of dioxin in the blood of workers at the smelter. This work included consideration of earlier congener profile analysis ("fingerprinting") that determined that the smelter was unlikely to be the primary source of dioxin-like chemicals in the area.

- 2007-8 *Soil and Groundwater Risk Reduction Standards for PCBs, mercury and other chemicals at the LCP Chemical Site under the Georgia EPD Hazardous Substances Response Act***
As a subcontractor, prepared detailed calculations of soil and groundwater screening values based both on direct exposure and transfer of chemicals from soil to groundwater.
- 2007 *Development of a white paper on the Non-cancer effects on humans of Dioxin-like Chemicals***
Collected scientific information related to potential and actual human health effects from published studies of the Yu-Cheng/Yusho poisoning, the Seveso exposure, the BASF plant exposure and the Viet Nam Ranch Hands and others as well as related laboratory animal studies and gene microarray studies. Organized this information to assess the likelihood of various health outcomes from dioxin exposure.
- 2006-7 *Development of Cancer Dose-Response Analysis for 2,3,4,7,8-Pentachlorodibenzofuran***
In consultation with other scientists, developed probability distributions for the cancer slope factor of 2,3,4,7,8-PeCDF in rats using EPA's Benchmark Dose Software and physiologically-based pharmacokinetic modeling. This work was presented at the 2007 Society of Toxicology meeting and has been submitted to Toxicological Sciences.
- 2006-7 *Assessment of the Non-Dioxin-like Toxicity of PCB Mixtures***
Developed a new method for assessing the toxicity of PCB mixtures. This work involved determining relative estimates of potency for non-dioxin-like PCB congeners. In PCB risk assessments to date, the sole focus has been on the cancer endpoint and the role of the coplanar dioxin-like PCBs. This groundbreaking work seeks to understand the toxicity of the non-coplanar PCB congeners and to provide quantitative estimates of this toxicity. The relative potency estimates developed in this work were applied in this paper to assess the toxicity of any PCB mixture relative to Aroclor 1254 or Aroclor 1016 for applications in fish advisories and fish consumption risk assessment. A paper titled "Development of a Neurotoxic Equivalence Scheme of Relative Potency for Assessing the Risk of PCB Mixtures" was published in May 2007 in *Regulatory Toxicology and Pharmacology* and a presentation was given on this work at the international conference "Dioxin 2007" held in Tokyo, Japan.
- 2006 *Assessment of Possible Drug/Alcohol Impairment in a Personal Injury Case.***
Examined quick urine drug screen results and developed an assessment for possible impairment. The drug screen results involved possible alcohol and marijuana use.
- 2006 *Memorandum on the Recent History of Arsenic Regulation by EPA***
Produced a memo for attorneys detailing the history of arsenic regulation as a soil contaminant by EPA headquarters and by Region 4 EPA (Southeast) since 1988. The memo included an annotated list of supporting references.
- 2006-10 *Risk Assessment for the Residential Exposure Scenario for PCBs and mercury in Upland Soils at the LCP Chemical Site, Brunswick, GA.***
Working as a sub-contractor, conducted a risk evaluation for residential exposure. The original risk assessment for the LCP site did not include an estimate of risk to on-site residents or other human receptors with a small exposure unit (ca. 0.5 acres). This risk evaluation will be part of an updated remedial investigation to submit to USEPA.
- 2006-7 *Risk Assessment for Consumption of Estuarine Fish containing Toxaphene Residues by Coastal Georgia Residents***
As a sub-contractor, developed fish consumption estimates for coastal Georgia residents based on the previous surveys in the Brunswick area. These estimates were used along with Dr. Simon's published work on the toxicity of toxaphene in a probabilistic risk assessment for fish consumption prepared for USEPA.

- 2006** ***Development of a Physiologically-based Pharmacokinetic Model for Copper in Migratory Birds for Ecological Risk Assessment of Mine-Associated Tailings Ponds***
High copper concentrations in water may be toxic to birds, especially when associated with acid mine drainage. This project entailed the development of a PBPK model of copper absorption, distribution, metabolism and excretion (ADME) in juvenile ducks and adult geese. In addition, an assessment of the feasibility of incorporating the physiological changes associated with migration into the model was conducted. The model may be used to estimate toxic concentration thresholds for copper in acidic waters.
- 2006** ***Evaluation of Fish Advisories and Risk of Weathered Toxaphene Residues in Fish at Terry Creek near Brunswick, GA***
As a sub-contractor, conducted an evaluation of fish advisories published by the Georgia Department of Natural Resources by applying the newly developed toxicity criterion for weathered toxaphene.
- 2001-06** ***University of Georgia Graduate Course in Environmental Risk Assessment***
Developed and taught a graduate-level class on Environmental Risk Assessment. The course lasted 15 weeks, 3 hours per week, and presented details of chemical analysis, exposure assessment and modeling, statistics and toxicology. The class has been presented three times.
- 2006** ***Development of a white paper presenting the history of Probabilistic Risk Assessment (PRA) at EPA***
Both the Federal Office of Management and Budget and the USEPA have emphasized the importance of quantitative analysis of variability and uncertainty, i.e. probabilistic risk assessment. Reviewed EPA guidance documents and scientific literature and produced a document that detailed this complete history of PRA at EPA and suggested likely uses of PRA in the future.
- 2006** ***Consultation on dioxin emissions from a secondary copper smelter***
Provided advice regarding dioxin toxicity and possible investigation strategies for assessing dioxins and furan emissions from a secondary copper smelter. Attended a meeting with Georgia Environmental Protection Division personnel and provided information regarding the toxicity and carcinogenicity of dioxin. Conducted an analysis of dioxin congener profiles ("fingerprinting") to determine the sources of dioxins in environmental media.
- 2006** ***Pro Bono Evaluation of Georgia DNR Fish Advisories***
Currently there are stringent fish advisories in place for the coastal Georgia region near Brunswick and Saint Simons Island. The chemicals involved are mercury, toxaphene, and Aroclor 1268. Dr. Simon recently published a new toxicity criterion for toxaphene and for PCBs (see above). These fish advisories were re-evaluated in a pro bono effort for Dr. Randy Manning, the Georgia state toxicologist.
- 2005** ***Risk Communication regarding solvents in groundwater at Augusta, Georgia***
As an EPA toxicologist, provided information to citizens at a public meeting regarding the possible health effects of tetrachloroethylene and trichloroethylene in groundwater relating to a RCRA site.
- 2005** ***Reassessment for the Need for PCB Congener Analysis at the Anniston/Solutia PCB Site***
As an EPA toxicologist, performed a comparison of results from PCB cancer bioassays indicates that the cancer potency for dioxin-like PCBs in PCB mixtures is greater than recent estimates of the cancer potency of 2,3,7,8-TCDD (dioxin) itself. This work was presented as an EPA memo commenting on an August 2005 internal EPA draft of the PCB risk assessment guidance.
- 2005** ***Development of Nondetect Surrogate Values for Dioxin***
Performed as an EPA toxicologist. The common practice of the use of contract reporting limits as nondetect surrogates for dioxin analysis leads to large overestimates of risk when these nondetect surrogates are used in calculating concentration. The estimated detection limit (EDL) and estimated maximum possible concentration (EMPC) provide a more accurate nondetect surrogate value based on the actual chemical analysis and this method was provided in an EPA memorandum.

- 2005-6** ***Estimate of the Toxicity of "Weathered" Toxaphene for Human Health Risk Assessment***
Performed as an EPA toxicologist. An estimate of the toxicity criterion (Reference Dose) for weathered toxaphene was needed for risk assessment of the Hercules site in Brunswick, Georgia, where the pesticide toxaphene was produced. Technical toxaphene is a mixture of over 600 chemicals and "weathers" in the environment to a smaller group of different chemicals. Little toxicological data was available for "weathered" toxaphene. This analysis included a re-evaluation of the European MATT value for weathered toxaphene and development of a new reference dose base on human body burdens of toxaphene. This analysis was co-authored by Dr. Randy Manning of the Georgia Environmental Protection Division and in 2006 was published in *Regulatory Toxicology and Pharmacology*.
- 2005** ***Review of Proposed Arsenic Toxicity Assessment to be placed on IRIS***
As an EPA toxicologist and consensus reviewer for EPA's IRIS database, reviewed and provided comment on proposed changes to the arsenic toxicity assessment.
- 2005** ***Short Course to Michigan Department of Environmental Quality of Probabilistic Risk Assessment and Statistics***
With Dr. Philip Goodrum, presented a 1 ½ day class on probabilistic risk assessment and statistics as part of a week long workshop on PRA sponsored by the Society for Risk Analysis and Interstate Technology Regulatory Council Workshop
- 2005** ***Geostatistical modeling of dioxin concentrations in soil, Escambia Treatment site in Pensacola, FL.***
Performed as an EPA toxicologist. This Superfund site is highly controversial and, in 1996, was characterized in the NY Times as "Mount Dioxin." This analysis, completed in 2004, was developed to suggest a change in the land use and a lowering of cleanup costs. Knowledge of the mechanism of contaminant transport and geostatistical estimation of concentrations were used to refine risk estimates for soil. The method can yield considerable savings in analytical costs.
- 2004-5** ***Risk Communication to Community Against Pollution (CAP), a citizens group in Anniston, AL***
As an EPA toxicologist, developed a relationship with CAP and presented information on the health effects of PCBs at several public and community meetings.
- 2004** ***Consultation with EPA Region 4 Mercury Study Group***
As an EPA toxicologist, provided information to a group of Region 4 personnel to address an editorial regarding human health and mercury by R. Harold Brown that appeared in the Atlanta Journal-Constitution on 23 Dec 2003.
- 2004** ***Providence Park Ecological Risk Assessment***
Developed and authored an ecological risk assessment for the Providence Park site in Alpharetta, Georgia. This activity involved site visits, comparison of environmental sampling results with ecological benchmarks, and food web modeling. This work was prepared for Fulton County, GA to be submitted to the Georgia DNR.
- 2004** ***Geostatistical modeling of residual dioxin in soil at the Coleman-Evans site in Jacksonville, FL.***
Performed as an EPA toxicologist. \$80 million dollars has been spent on soil cleanup at this former wood treatment facility, now a Superfund site. The analysis showed that the cleanup was successful and current conditions at the site were protective of human health. In addition, analysis of dioxin congener profiles ("fingerprinting") was used to show that dioxins found in an off-site location were unrelated to activities at the site.
- 2004** ***Risk Communication regarding Trichloroethylene***
As an EPA toxicologist, provided information to the Citizen's Advisory Group (CAG) at Anniston Army Depot and a group of concerned citizens about the health effects of trichloroethylene. The group was concerned about drinking water releases.

- 2003** ***Cleanup of a skeet range at NAS Cecil Field in Jacksonville, FL.***
Performed as an EPA toxicologist. This skeet range was used in the 1940's and lead was present in surface soil at concentrations up to 65,000 mg/kg. The site is 85 acres in size and the initial estimates of cleanup costs were between \$15 and \$20 million. Using both geostatistics and exposure assessment, the area needing remediation was greatly reduced and the present estimated cleanup costs are approximately \$300,000. During this project, Dr. Simon collaborated with Dr. Steve Roberts of the University of Florida to develop a soil lead concentration protective of acute effects in children.
- 2003-4** ***Model of Chemical Release from a Railroad Tank Car***
Developed a method for modeling the release and dispersion of a dense gas from a railroad tank car. Source characteristics were obtained using basic physical chemical principles. Dispersion modeling was performed for dense gas dispersion in complex terrain. This model was used in successful defense of litigation.
- 2003-5** ***Development of EPA's Guidance on Surface Soil Cleanup at Hazardous Waste Sites: Implementing Cleanup Levels EPA 9355.0-91.***
Performed as an EPA toxicologist. For many years, risk-based cleanup levels were applied as "not-to-exceed" levels for cleanup purposes. This resulted in "overremediation" of sites and unnecessary cost. This guidance presents methods for applying risk-based cleanup levels as area averages. The guidance was written in consultation with Ms. Janine Dinan of EPA and Dr. Shahrokh Rouhani of Newfields, Inc. In 2004, the guidance was presented at the National Association of Remedial Project Managers in a 4 hour training session. The development of the guidance started in 1996 with an EPA Science Advisory Board Consultation.
- 2003** ***Expert Testimony in EPA vs. Norman C. Mayes***
As an EPA expert in toxicology, provided testimony to Administrative Law Judge Barbara Gunning regarding the health effects of benzene and other fuel components and environmental sampling around underground storage tanks. The decision, issued in March, 2005, was entirely favorable to EPA.
- 2003** ***Short Course to Ontario Ministry of Environment on Probabilistic Risk Assessment***
With Dr. Philip Goodrum, developed and taught a class on probabilistic risk assessment, including probabilistic approaches to dose-response to personnel at the Ontario Ministry of Environment in Toronto, Canada
- 2003** ***Georgia State University Graduate Course in Simulation Modeling***
Taught a graduate level course in Simulation Modeling. Students were provided lectures on statistics, probabilistic methods and time-dynamic differential equation models.
- 2002-4** ***Air and Exposure Modeling and PBPK Model Development of Creosote Exposure at a Wood Treatment Facility***
Developed a comprehensive database of chemicals in wood preservative made with coal tar creosote. Modeled air concentrations of these chemicals at a treatment facility. Developed a physiologically-based pharmacokinetic model for creosote exposure that included ingestion, inhalation and dermal pathways. This model and the information developed were used in defense of litigation and resulted in a successful summary judgment.
- 2001-2** ***Expert Testimony regarding Calibration of the Intoxilyzer 5000***
Developed testimony regarding the calibration procedures of the Intoxilyzer 5000. This is the "breathalyzer" used in Georgia for DUI testing. The machine is calibrated using a single concentration standard, usually corresponding to a Blood alcohol level of 0.1 mg/dL in lieu of a range of standards. The machine is then used to determine if individuals are above or below 0.08 mg/dL (adult level) or 0.02 mg/dL (level for minors 18-21). Charges in DUI cases have been dropped in the three cases in which Dr. Simon was involved.
- 2001** ***Short Course to TNRCC on Probability Distributions***
With Dr. Philip Goodrum, developed and taught a class on statistics and probability distributions to data to the Texas Natural Resource Conservation Commission

- 2000** ***Amended Guidance on Ecological Risk Assessment at Military Bases: Process Considerations, Timing of Activities, and Inclusion of Stakeholders.***
Performed as an EPA toxicologist. This EPA document, authored solely by Dr. Simon, enabled ecological risk assessments to be completed in a timely manner and ensures that risk assessment activities occur at times consistent with DOD funding schedules.
- 1999-2000** ***Acrylamide Release from a Railroad Tank Car***
Developed a model of release and transport of acrylamide from a railroad tank car. This model was used to predict air concentrations of several chemicals and was used in a successful defense of litigation.
- 1999-2000** ***Workshops on Probabilistic Risk Assessment***
Performed as an EPA toxicologist. In 1999 and 2000, worked with Dr. Steve Roberts of the University of Florida to organize two workshops on PRA. These workshops were sponsored by EPA, NIEHS and the University of Florida.
- 1999** ***Grant Review for IRSST, Canada***
Reviewed a grant proposal in French that proposed setting occupational standards for volatile chemicals based on probabilistic PBPK modeling. The grant was eventually funded and the project was significantly improved based on this review.
- 1999** ***Short Course to TNRCC on Probabilistic Risk Assessment and Statistics***
With Dr. Philip Goodrum, developed and taught a class on probabilistic risk assessment and statistics to the Texas Natural Resource Conservation Commission.
- 1998** ***Expert Panel on Selection of Input Distributions for Probabilistic Risk Assessment.***
As an EPA toxicologist, served on an expert panel for EPA's Risk Assessment Forum that led to the development of a guidance document from the National Center for Environmental Assessment
- 1997** ***Short Course to Navy Environmental Health Center on Probabilistic Risk Assessment***
Developed and taught with Dr. Philip Goodrum a class in probabilistic risk assessment to personnel at the Navy Environmental Health Center in Norfolk, VA.
- 1996-9** ***Development of "Risk Assessment Guidance for Superfund, Part 3. Process for Conducting Probabilistic Risk Assessment."***
Performed as an EPA toxicologist. This guidance was produced between 1996 and 1999. Primary author of chapter 7, "Using PRA to Calculate Preliminary Remediation Goals" and portions of Chapter 4 regarding the concentration term. Dr. Simon won EPA's Science Achievement Award for his work on this guidance.
- 1996** ***Removal of ATSDR's intermediate MRL for Trichloroethylene***
While at ATSDR, achieved a consensus for removing the intermediate minimum risk level for trichloroethylene. At that time, this number was based on questionable science. Further research supported this decision.
- 1995** ***Region 4 Bulletins: Regional Risk Assessment Guidance***
As an EPA toxicologist, authored Region 4 risk bulletins on Toxicity Assessment and on Development of Remedial Goal Options.

PEER REVIEWS

- 2013** *Human and Ecological Risk Assessment*, Dr. Barry Johnson, Ed. "Assessment of Soil Screening Levels due to Accidental Ingestion of Chrysene and Benzo[k]fluoranthene at Iran's TOR Site."

GRANTS, AWARDS AND HONORS

- 2010 Honorable Mention from Risk Assessment Specialty Section of the Society of Toxicology for the best paper of the year in 2009 for Simon T, Kirman, CR, Aylward LL, Budinsky RA, Rowlands JC (2009) Estimates of Cancer Potency of 2,3,7,8-Tetrachlorodibenzo(p)dioxin using Linear and Non-linear Dose-Response Modeling and Toxicokinetics. *Toxicological Sciences* **112**(2), 490-506.
- 2005 Recognition from the SouthWire Company for innovative approaches to Environmental Cleanup
- 2005 EPA Bronze Medal for Testimony in the Norman Mayes case in Knoxville, TN that led to additional UST regulations being passed by the State of Tennessee
- 2005 EPA Bronze Medal for Developing Guidance on Monitoring Land Use Controls
- 2002 EPA Science Achievement Award for Probabilistic Risk Assessment Guidance
- 1995 EPA Bronze Medal for Commendable Service
For leadership in setting the example in self-directed work team management and in setting

the example in "fast-track" multimedia environmental investigation and cleanup

- 1992 Environmental Education Enterprises Scholarship in Environmental Science, "Principles of Environmental Drilling and Sampling," Association of Engineering Geologists, Atlanta, GA
- 1992 Special Award from the Vice President for Research, Georgia State University, "Evolution of different prey choice and feeding strategy in two related species," \$1000
- 1989 National Research Service Award F32 NS08394-01A1 from NIH-NINCDS "Modulation of Ionic Channels in an Oscillatory Network, Emory University, \$41,000
- 1989 Donald B. Lindsley Prize in Behavioral Neuroscience for Ph.D. Thesis, Honorable Mention for Ph.D. thesis, "The Neural Basis of Light Evoked Walking in Crayfish," Society for Neuroscience

SELECTED INVITED LECTURES

- 2014 "Neurotoxicology in the Courtroom." Invited Speaker in a symposium at the 2014 meeting of the Society of Toxicology.
- 2013 Four Lectures in Graduate Level *Environmental Risk Assessment and Risk Communication*, University of Georgia, Athens, GA, Spring 2013
- 2012 Four Lectures in Graduate Level *Environmental Risk Assessment and Risk Communication*, University of Georgia, Athens, GA, Spring 2012
- 2011 "The Toxic Equivalence Factor for 2,3,7,8-Tetrachlorodibenzofuran: Chemical-Adjustment Factors for Addressing TEF Uncertainty." Dioxin 2011, Brussels, Belgium, August 23, 2011
- 2011 "Dose Thresholds in Cancer Risk Assessment: Yes, they do exist." University of Georgia, Department of Environmental Health Science, Athens, GA, October 26, 2009
- 2010 "Linear vs. Nonlinear Extrapolation for Dose-Response Assessment of TCDD," Dioxin 2010, San Antonio, TX, September 15, 2010
- 2010 "Using Human in vivo AHR Activation as a Functional Dose Metric for Risk Assessment Based on Chloracne, Effects in Keratinocytes and Background CYP Induction," Dioxin 2010, San Antonio, TX, September 13, 2010
- 2009 "Dose Thresholds in Cancer Risk Assessment: Yes, they do exist." University of Georgia, Department of Environmental Health Science, Athens, GA, October 26, 2009
- 2008 "Toxaphene – How Bad is this Pesticide?" University of Georgia, Department of Environmental Health Science, Athens, GA, October 9, 2008
